

Website Developer

Type: Contract / Part-time

Location: Meadville Office (On-Site Preferred) / Remote

Description: The Web Developer primarily works on client websites and other related projects as needed. This role is expected to bring practical web development abilities with an eye for design along with. You will work closely with our SR Web Developer, project manager, account managers, content production manager, graphic designers, and other internal stakeholders to bring to life a client's brand, product information and collateral, and other website content, via the code you write.

Values and Traits to demonstrate in your role:

- **Communication:** Clarity, alignment, and purpose (CAP) - does everyone involved have it?
- **Quality:** The standard is what's allowed to happen, not what's supposed to happen. Inspect what you expect.
- **Innovation:** Are you checking the box or out of the box?
- **Flexibility:** Improvise, adapt, and overcome; the worst thing is to do nothing.
- **Judgment:** A good plan executed now is better than a perfect plan executed too late. Think it through; don't overthink it.
- **Initiative:** A wet noodle can't be pushed; it's got to be pulled if you want to move forward

Responsibilities for this role include:

- Develop and implement front-end web code and design standards and writing clean, semantic code for multiple browsers
- Create automatically responsive webpages for mobile, tablet, and desktop.
- Integrate data from various back-end services and databases
- Be familiar with on-site, back-end SEO best practices.
- Wireframe and mockup revamped or brand-new site pages and present to senior management.
- Proactively scope and present new ideas to improve our website experience for prospects, leads, and customers.
- Maintain project deadlines while maintaining the highest standards of quality web development.
- Stay up-to-date on the latest trends, including agile methodology and emerging best practices in the UX/UI community.

Skills and experience that give you the edge:

- BA/BS degree or equivalent working experience.
- Strong background with WordPress, PHP, HTML5, CSS3, JavaScript, jQuery, APIs.
- Experience with Shopify and other ecommerce platforms a plus
- Proficiency with Monday.com project management tools
- Domain expertise in UI/UX best practices.
